

\*\*\*\*\* **IMPORTANT** \*\*\*\*\*

Please read these latch installation instructions carefully prior to using your new battery

The Compaq Presario 1200, 1600, and 1800 series notebooks use the same battery, but with different latch types. Depending on the model laptop that you own you will use latch A or latch B, both of which are provided with your new battery. Please follow the instructions below in order to install the correct latch onto the battery. Select the latch carefully. Once the latches are installed they are very difficult to remove.

1. First compare your existing battery latch to the two latches included with the new battery. Determine the correct latch.

Latch A

Latch B

2. Lay the new battery with the label side down and arrow pointing downwards.

3. Align the arrow on the battery with the arrow on the latch you have selected.

4. Align the rails on the latch with the slots on the battery. Snap the latch into place.
